CARE & TIPS FOR YOUR HUMAN HAIR WIG

WASHING

BEFORE WASHING, REMOVE ANY BACKCOMBING AND TANGLES BY COMBING WITH A WIDE TOOTH COMB OR WIG BRUSH, FROM THE END TO THE BASE. FOR CURLY STYLES, USE FINGERS TO REMOVE TANGLES AND BACKCOMBING

IN A BASIN OF LUKE WARM WATER, APPLY A SMALL AMOUNT OF SHAMPOO TO CREATE A BUBBLE BATH SOLUTION

SUBMERGE THE WIG FOR 5-10 MINUTES, GENTLY SWISHING IN A SLOW CIRCULAR MOTION, ALWAYS IN THE SAME DIRECTION. (AVOID RUBBING AS IT MAY CAUSE KNOTS). TURN WIG INSIDE OUT AND REPEAT, TO SOAK THE FRAME SIDE OF YOUR WIG

RINSE THOROUGHLY BY SOAKING IN COOL WATER UNTIL ALL SHAMPOO PRODUCT HAS BEEN COMPLETELY REMOVED

CONDITIONING

APPLY A MILD CONDITIONER TO THE HAIR OF THE WIG, AVOIDING THE BASE CAP OF THE WIG (APPLYING CONDITIONER TO THE BASE OF THE CAP MAY WEAKEN THE KNOTS)

WORK CONDITIONER USING FINGERS GENTLY TO THE ENDS OF THE HAIR. IF USING SPRAY IN CONDITIONER; APPLY AFTER WASH, SPRAYING LIGHTLY AND EVENLY. ALLOW TO DRY

RINSE CONDITIONER THOROUGHLY UNTIL WATER IS CLEAR

DRYING

WRAP WIG IN A TOWEL, PATTING GENTLY TO REMOVE EXCESS WATER. FOLLOW BY PLACING WIG ON A VENTED WIG STAND. LIGHTLY FLUFF WITH WINGERS, AND ALLOW TO DRY NATURALLY. BLOW DRYING CAN BE DONE (WITH GENTLE BRUSHES)

STYLING

USE HEAT TREAT FOR YOUR HUMAN HAIR WIG, TAKING CARE NEVER TO BRUSH WHILE IT IS WET
