## CARE & TIPS FOR YOUR SYNTHETIC WIG

### CARING FOR SYNTHETIC WIGS

- WASH EVERY TWO WEEKS IF WORN DAILY, OR EVERY 25 WEARS
- TO SHAMPOO YOUR WIG, IMMERSE IN COOL WATER USING ONLY WIG SHAMPOO PRODUCTS DESIGNED FOR SYNTHETIC HAIR.
- ADD ONE CAPFUL OF SYNTHETIC WIG SHAMPOO TO 8 CUPS COLD (NEVER HOT) WATER. LET SOAK FOR 10 MINUTES. TURN WIG INSIDE OUT TO CLEANSE THE INNER FRAME OF THE WIG
- RINSE GENTLY BY SOAKING TO REMOVE ALL EXCESS PRODUCT, THEN TOWEL DRY USING A DABBING TECHNIQUE
- DO NOT SQUEEZE OR TWIST. DO NOT COMB OR BRUSH WHILE FIBERS ARE WET
- SPRAY LEAVE IN CONDITIONER, AND PLACE WIG ON A VENTED HEAD STAND TO DRY NATURALLY

### STYLING TIPS FOR SYNTHETIC FIBER

- NEVER USE A CURLING IRON OR BLOW DRYER ON SYNTHETIC FIBER, AS IT WILL CAUSE THE FIBERS TO MELT. \*ANY SUDDEN BURST OF HEAT, SUCH AS OPENING AN OVEN OR BARBECUE WILL CAUSE DAMAGE TO YOUR SYNTHETIC HAIRPIECE\*
- LAY YOUR WIG ON A FLAT SURFACE TO DRY NATURALLY, OR DRAPE IT OVER A VENTED WIG HEAD SO THAT AIR CAN CIRCULATE AROUND IT. NEVER PUT A SYNTEHTIC HAIR PIECE ON A SOLID HEADSTAND OR BLOCK WHILE WET, AS IT WILL STRETCH THE CAP
- ONLY BRUSH OR COMB AFTER YOUR HAIR PIECE HAS DRIED COMPLETELY
- HEIGHT CAN BE ACHIEVED BY GENTLY LIFTING WITH YOUR BRUSH, OR YOUR WIG CAN BE STYLED CLOSER TO THE HEAD FOR A FLATTER LOOK. FULLNESS CAN BE ACHIEVED BY BACKCOMBING GENTLY, THEN SMOOTHING THE SURFACE HAIR.
